- Project Assessment and Rescue
- Program Portfolio Management
- Process Analysis and Re-Engineering
- Enterprise Risk Management
- Operational Assessment
- Human Resource Capacity Planning
- Business Impact and Disaster Recovery
- Technology Selection & Integration
- Systems & Application Optimization

Value Proposition

Our Program and Project Management experts deliver on time and on budget services while freeing your team to focus on what they do best. We help middle market firms and government agencies reduce the risks related to managing complex projects in a cost effective manner. Our approach is designed to drive change and maximize the success of every project, as we shrink project timetables and optimize the allocation of resources. No other firm can match how we tailor our value proposition to the special needs of our program and project management service clients.

How We Deliver Management Consulting Services

Our services are delivered by industry proven professionals. Unlike other consulting firms, we support our project and program management teams with our proprietary NOSAM methodology, best practices, and tools built for middle market clients. They are designed to be flexible in order to support our client's culture, strategic plan, and organization at any level of maturity.

Leadership Team

Paul Cevolani, CEO, and **Olen Pepple, COO**, both have in-depth experience delivering highly specialized business advisory services for Middle Market companies, government agencies, and service providers including Accenture, AAA, ServiceSource, AlphaStaff, and the US Navy.

Relevant Experience

The Novus Origo team brings over 50 years of hands-on experience, successfully planning and delivering many major national and international projects. Successful projects include:

Mergers and Acquisition Management – The client, a Human Resource Outsourcing company, offering employer solutions and benefits to over 70,000 employees, acquired a competitor with 1,000 clients and 30,000 employee records with disparate processes and business rules, and required a rapid integration of systems and business processes. Novus Origo led the complex integration of all business processes and data from multiple locations into a single system of record.

The project was completed in 4 months, saving the client several hundred thousand dollars, while creating one of the country's largest PEO's.

Project Management & Services Implementation

The client, an international insurance company with over 100 years of history and \$2 billion in assets, required project leadership for the multi-faceted implementation of its new best-in-class homeowner's insurance product. Novus Origo led a project team of over 150 business and technology staff members across numerous divisions and vendors on the complex implementation for more than 30 disparate systems.

The project was completed on-time and on-budget, which will allow the client to realize an anticipated \$25 million dollars in revenue.

Novus Origo is a Service Disabled Veteran Owned Small Business (SDVOSB) and Disabled Veteran Business Enterprise (DVBE).
